Wealth Management Today

Page-text

The Changing Landscape – What clients want

Page-text

Evolving A Needs Based Approach To Wealth Management

Page-text

Technology As An Enabler

Page-text

About Agile Financial Technologies

Page-text

High Costs

Page-text

- The days of low volatility and high margins are over
- Many wealth managers are only marginally profitable
- Assets and infrastructure of the parent institution subsidize the costs of the wealth management arm
- Profitability driven by new client and asset acquisition, which relies upon an unsustainable cost structure

Page-text

Page-text

Clients

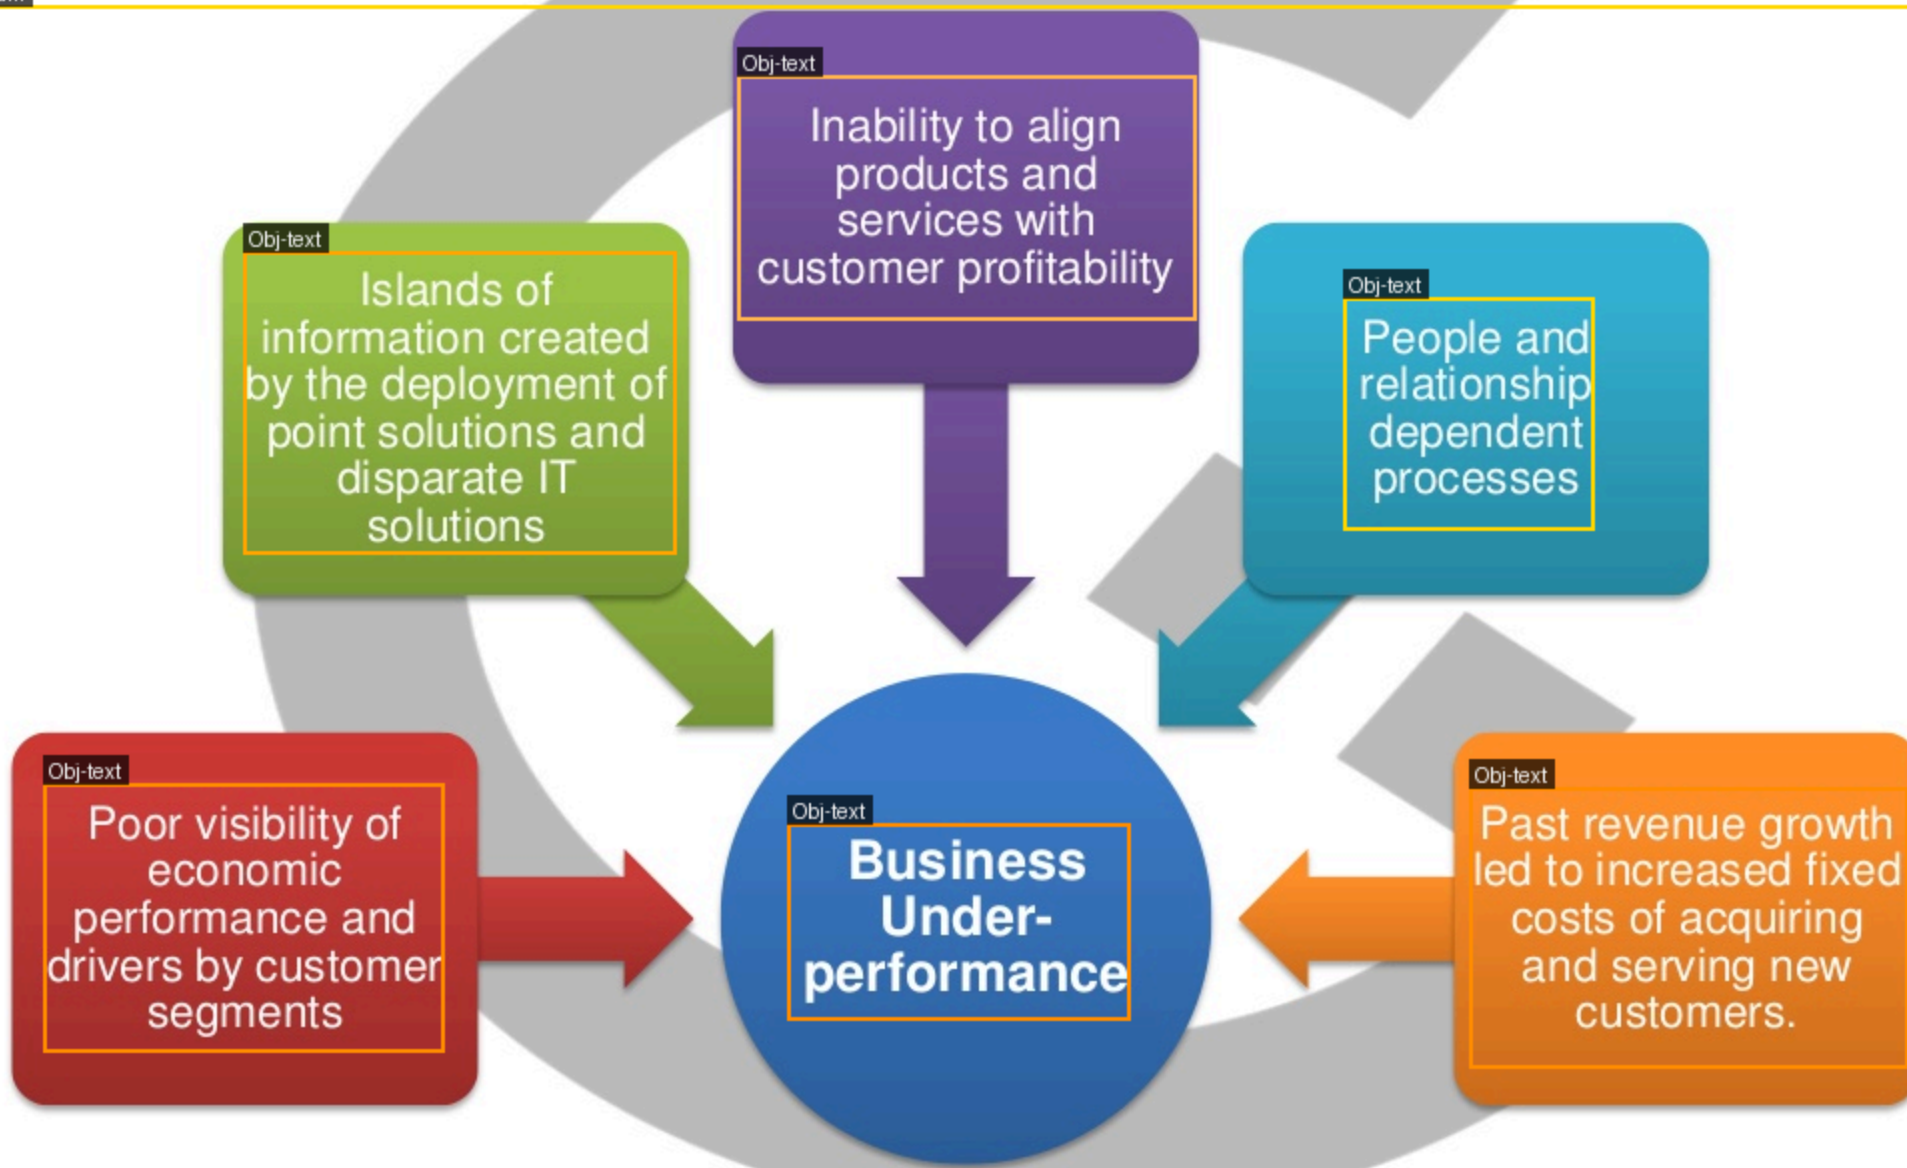

- Wealth Management associated typically with HNWI – who drive hard bargains & are a demand for extensive and expensive service levels
- Marketing to clients with too much or too little wealth
- Products and services offered not aligned to the behavior of individual client resulting in failure to target services that fit the goals of their clients
- Lack of attention to a new generation of mass affluents

Page-text

Inability to cross-sell

Page-text

- Unavailability of a consolidated perspective and client profiling across an institution's various arms (retail banks, brokerage businesses, and insurance operations) and concerted lead generation mechanism

About Agile Financial Technologies

Figure

Page-text

Traditional process of servicing

Page-text

- Brokerage services (product experts and financial advisors)
- Investment Management services (relationship-based approach to financial products)
- Wealth Planning (personal financial planner)

Page-text

Page-text

Page-text

How clients desire to be serviced

Page-text

- Global outlook to the investment approach
- Research on international development
- Transparency and visibility on portfolio performance and risk mitigation
- Support and resources and tracking of social returns on their philanthropic and charitable pursuits
- Choice of sectors, geographies, community focused, socially responsible investment screening

Page-text

Obj-text

"I dislike having too many experts involved."

Obj-text

"We work with many professionals –but do not have one person who looks at all scenarios such as selling real estate to finance retirement, options for selling the business, etc. It seems like we have the ideas and the professionals fill in numbers."

Obj-text

"...(strategic wealth) would be about reviewing all of my assets together. My financial planner is only concerned with what he has under his direct management."

Obj-text

"I have found that I come away with a view that I know more than they do."

- Prefer sophisticated advisors who can serve the entire spectrum of 'net worth' and understand their complex financial needs

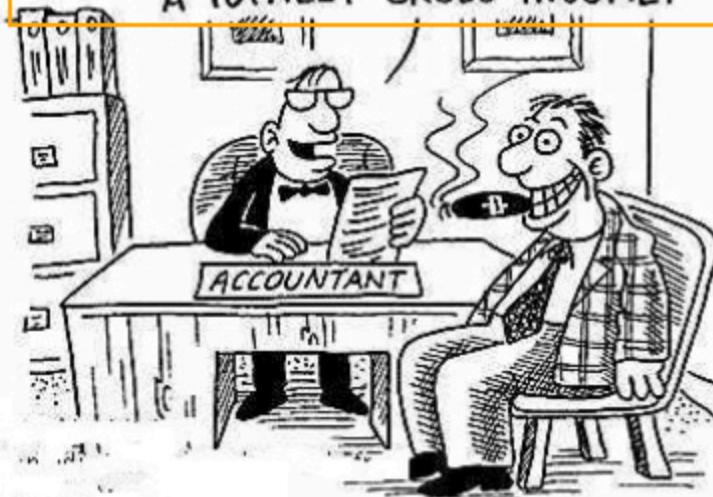

- Sophisticated wealth management services and strategic wealth advice

- Evidence of strong governance and risk management practices

- Ability to see a 360 degree perspective of their interaction with you – when they want to view it

- Transparency and timely reporting

CONGRATULATIONS MR. HENDERSON,
YOUR GROSS INCOME HAS JUST BECOME
A TOTALLY GROSS INCOME!

Technology As An Enabler

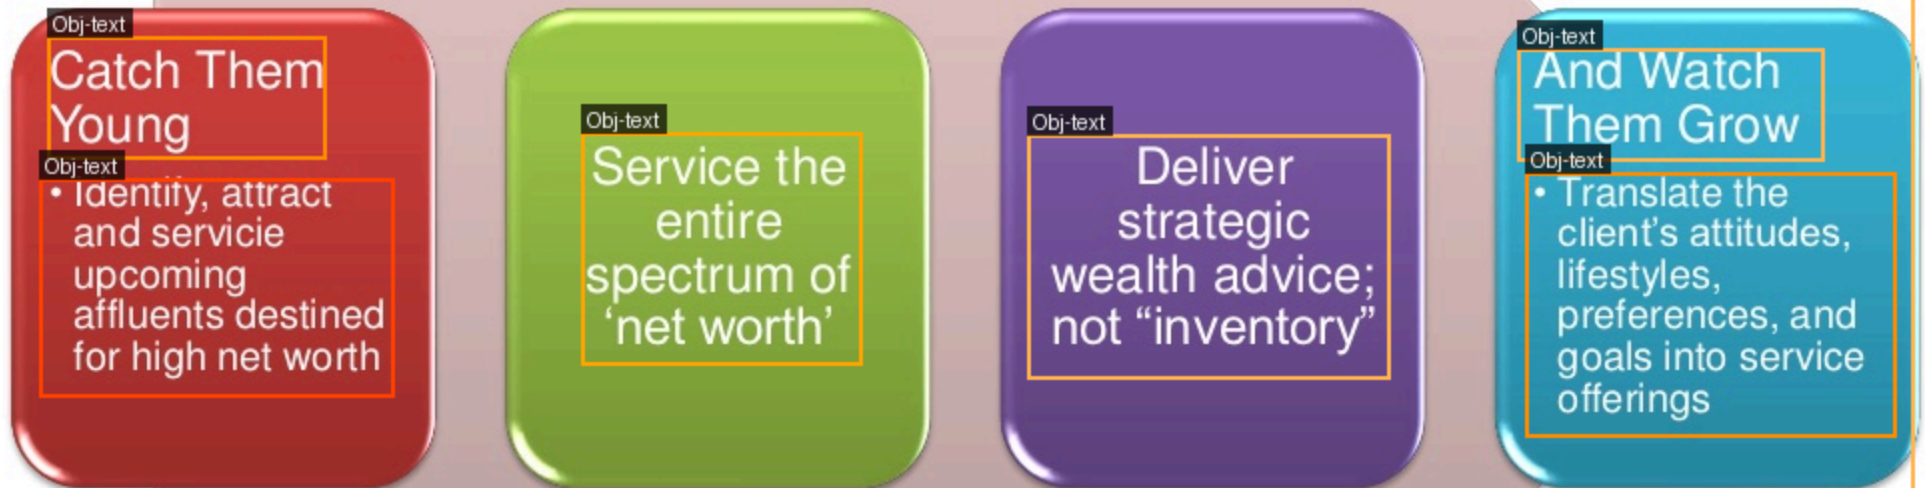

Page-text

About Agile Financial Technologies

Page-text

Business and customer strategy

Page-text

- Identify and migrate clients from banking services to wealth management services

Page-text

- Position advisory capabilities and best-of-breed investment products

Page-text

- Assess viability of providing a wealth management offering to the mass affluent

Page-text

Organizational design

Page-text

- Break out of silos to transition from a product-centric to a customer-centric organization

Page-text

- Integrate different components of offering to provide a single point of contact for clients

Page-text

Operational effectiveness

Page-text

- Build, buy or partner to offer more complete asset management, retirement & estate planning and protection capabilities

Page-text

- Leverage physical footprint

Page-text

- Ensure rigorous adoption of “know your customer rules”

Page-text

- **Shift from islands of information to a holistic integrated system**

Page-text

- **Deploy CRM to enable identification of potential wealth-management clients and provide an integrated view of the customer and information across all product groups**

Page-text

- **Using technology as a platform for serving the mass affluent**

Page-text

- **Improving information and data exchange to share information across silos**

Page-text

- Integrating legacy and new systems

Page-text

- **Outsource non-core functions to service providers**

Page-text

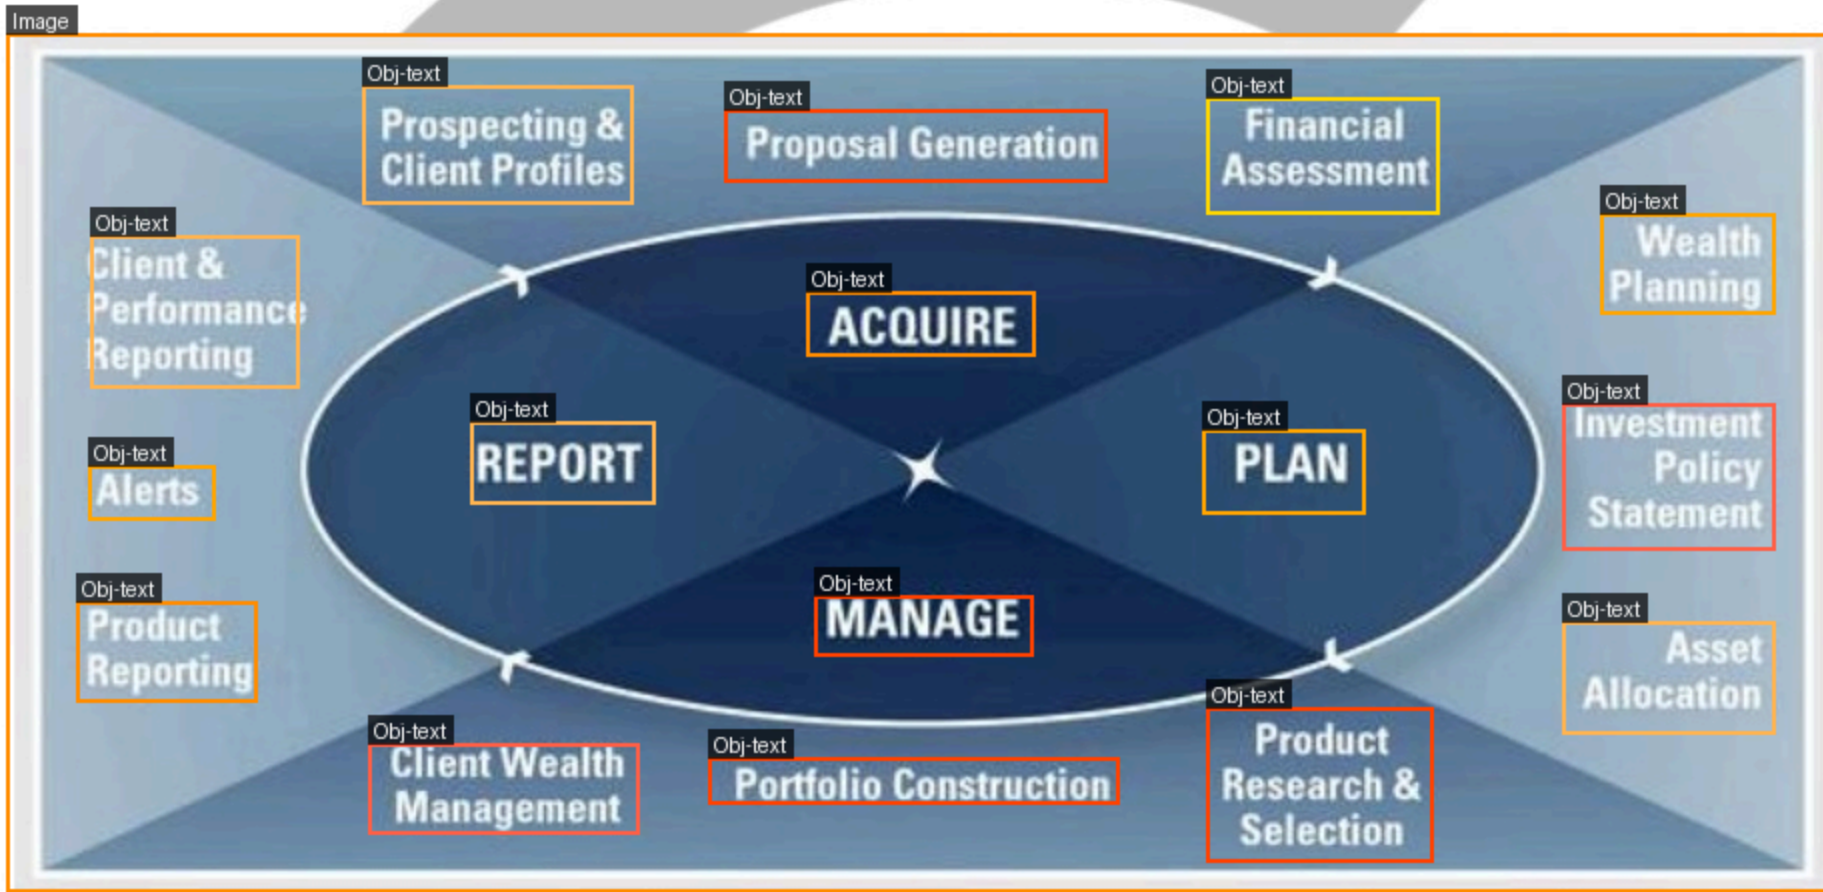

- Investment Accounting

Page-text

- Research

Page-text

- Reconciliation and transcription
